LEDT Task Light Series

If a majority of sensory experience is visual, why not make it more pleasant with task lighting.

Even though the initial fixture cost is higher with high quality LED lighting solutions, the total cost of owning, operating, and maintaining an LED lighting system is considerably less than comparable incandescent or fluorescent lighting solutions. This is due to their long life expectancy - several times that of incandescent, and almost twice as long as fluorescent, and because LEDs consume far less energy. Annual power costs can be reduced by up to 80%. For this reason, the total cost of LED lighting systems can be significantly lower than conventional systems. In fact, paybacks on LED lighting solutions are often realized in fewer than three years.

- 12' cord, 60 watt power supply for 31", 44" and 58" models, 15 watts for 17" model.
- Single touch on/off switch with 15%-100% continuous dimming with last state memory.
- Screw and magnetic mounting with adhesive cord managers
- Auto turn off after 10 hours of use.
- High quality, long lasting LED luminaires rated at 50,000 hrs.
- 3500k color "temperature" in the optimum neutral range for office work.
- Lead time 7-10 days.
- Color: Clear anodized aluminum housing with white end caps
- **Optional:** Daisy Chain connections, link 2 to 5 lights to 1 switch. Call for more information.
- **Optional:** Occupancy Sensor for maximum energy efficiency. Call for more information.
